

Reconnecting Your D2L Brightspace Integration

Action required: A recent update to the P&SS platform requires a new permission scope for the D2L Brightspace integration. Your integration currently remains Connected. Copy the new scope provided below and paste it into your P&SS OAuth 2.0 application in D2L Brightspace. Once you save that change, the integration status in P&SS will change to Disconnected — this is expected. Then follow Part 2 to reconnect it. This only needs to be done once.

Before you start, make sure you have:

- Admin access to your P&SS account
- Admin access to your D2L Brightspace site (specifically the Manage Extensibility area)
- About 10 minutes

Step-by-Step Guide

Part 1 — Update the scope in D2L Brightspace

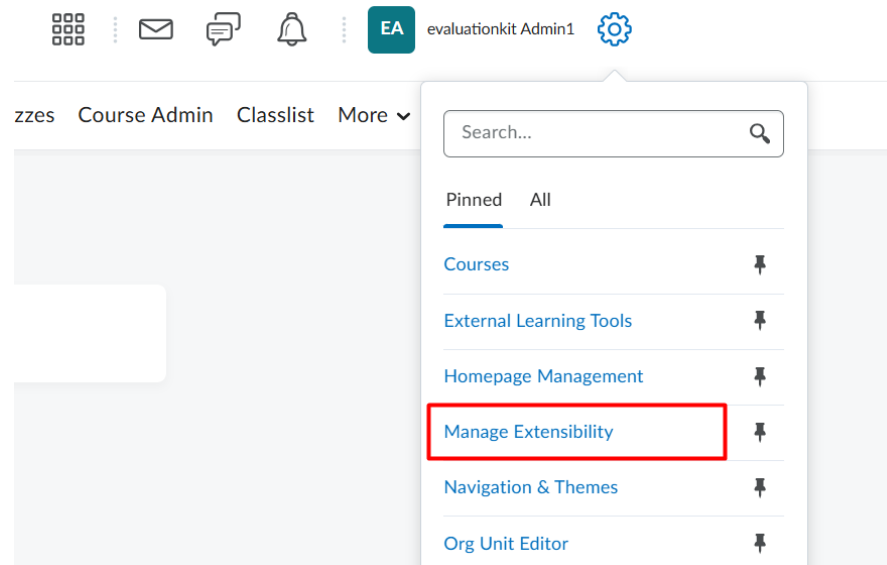

Step 1: Copy the new scope value

Copy the entire scope value below exactly as shown — you'll paste it into D2L in Step 5.

```
rubrics:objects:read rubrics:assessments:read dropbox:folders:read  
discussions:access:read discussions:forums:readonly discussions:topics:readonly  
enrollment:orgunit:read enrollment:own_enrollment:read grades:gradeobjects:read  
grades:gradevalues:read quizzing:quizzes:read
```

Step 2: Go to Manage Extensibility

Log in to D2L Brightspace as an administrator and navigate to Manage Extensibility.

Click the gear (Admin Tools) icon, then select Manage Extensibility from the menu.

Step 3: Open the OAuth 2.0 tab

Within Manage Extensibility, select the OAuth 2.0 tab. Locate the application that was originally created to connect D2L with P&SS.

OAuth 2.0

LTI Advantage

Service Users

ID Key Authorization

This list contains OAuth 2.0 applications registered by your institution.

Register an app

Application	Grant Type	Action
Hogwarts	Authorization	Delete
Magician Institution- P&SS	Authorization	Delete
P&ss_Qalndia_D2l_Integration	Authorization	Delete
UI Automation Org-PSS-Stage	Authorization	Delete

On the OAuth 2.0 tab, find your institution's P&SS application in the list (application names vary by institution).

Step 4: Open the app for editing

Click on that OAuth 2.0 application, then click Edit.

OAuth 2.0

LTI Advantage

Service Users

ID Key Authorization

This list contains OAuth 2.0 applications registered by your institution.

[OAuth 2.0 Apps List](#) > Assessment Catalyst University

Grant Type

Edit

On the application's detail page, click Edit (top right).

Step 5: Replace the scope

In the Scope field, remove the existing scope value entirely, then paste in the new scope you copied in Step 1.

The screenshot shows the 'OAuth 2.0' tab selected in the top navigation bar. Below the tabs, a message states: 'This list contains OAuth 2.0 applications registered by your institution.' The form includes the following fields:

- Grant Type:** Authorization
- Application Name*:** Assessment Catalyst University
- Redirect URI*:** https://planning.watermarkinsights.com/measure/d2l_lms/code
- Scope*:** core:.* discussions:access:read discussions:forums:readonly discussions:topics:readonly en000C (This field is highlighted with a red border in the original image)
- Access Token Lifetime (seconds)*:** 3600

In the app's Edit screen, clear the Scope field and paste in the new value from Step 1 (highlighted above).

Step 6: Save your changes

Click Save to update the OAuth 2.0 application with the new scope. Once saved, the D2L integration status in P&SS will change from Connected to Disconnected — this is expected.

Part 2 — Reconnect in P&SS

Step 7: Check the integration status in P&SS

Log in to P&SS as an administrator. Go to your LMS Integrations page. You'll see the D2L integration listed with a status of Disconnected — this is expected after saving the new scope in D2L.

The screenshot shows a card for 'D2L Brightspace LMS' with a status of 'DISCONNECTED - REVIEW MAPPINGS'. Below the title, it says 'D2L Learning Management System'. The card features three metrics: 'Last Sync' (3 minutes ago), 'Sections Mapped' (0 / 7,547), and 'Students Mapped' (0 / 0). At the bottom left, it states 'Active since 07/17/2026'. A 'REVIEW MAPPINGS' button is located at the bottom right. A three-dot menu icon is in the top right corner.

The D2L Brightspace LMS card in P&SS showing "Disconnected - Review Mappings."

Step 8: Click "Reconnect"

Click the Reconnect button next to the D2L integration. This opens the D2L integration setup page.

This screenshot is similar to the previous one but includes a dropdown menu that appears after clicking the three-dot menu icon. The menu contains two options: 'Reconnect' (with a plug icon) and 'Deactivate' (with a trash can icon). The 'Reconnect' option is highlighted with a green rectangular box.

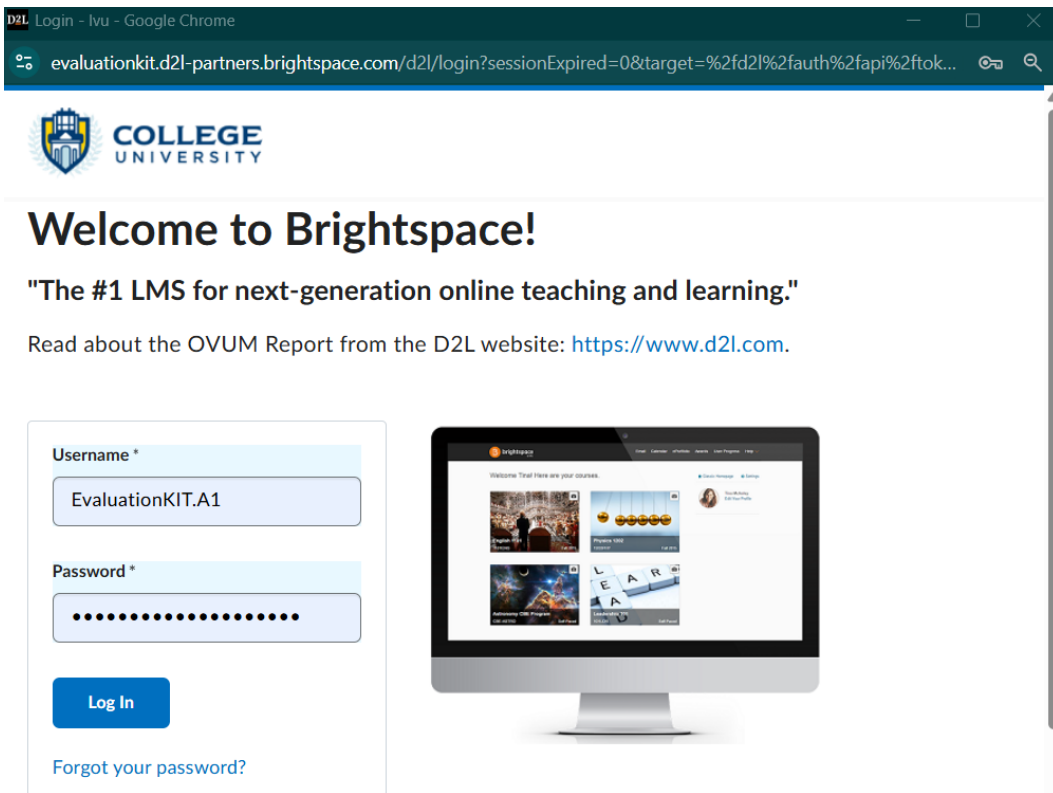

Click the ⋮ menu on the D2L Brightspace LMS card, then select Reconnect (not Review Mappings).

Step 9: Click "Authorize"

On the setup page, click the Authorize button to begin reconnecting the integration.

Step 10: Log in with your D2L credentials

When prompted, sign in with your D2L Brightspace administrator credentials to complete authentication.

A D2L Brightspace login window opens — enter your D2L administrator username and password, then click Log In.

Step 11: Confirm the integration is connected

Once authentication completes, the D2L integration status in P&SS will change back to Connected. No further action is needed.
